

## NEW – WEIGHING SYSTEM FOR TRUCKS

Vetec's weighing solution for trucks makes it possible to unload with high accuracy and fully avoid the costly and time-consuming drive after a weigh bridge.

### THE SYSTEM CONSISTS OF

- Load cells, 6 x chassis mount cells.
- Junction box, gathers the load cell signals.
- Display or printer placed in the cab.

NOTE: The weight can also be viewed on a remote control with to-way communication that also controls the trucks pump/suction system.

### FEATURES

- Significant time savings, makes weigh bridge unnecessary.
- Safe and accurate system (within 50-100kg.) .
- Easy to install and operate.
- Especially suitable for vrac.
- The customer receives the right amount.
- Avoid overload.
